

# DR. **BASKARAN**

My good friend Baskaran is a physician and spiritual leader from South India. His personal task on Mother Earth is to teach and use his abilities to make human time here on earth livable. He has managed to carry out his intention in India:

- provide food to millions of hungry people
- provide a comprehensive education system for poor children
- food and domestic help for poor elderly people living on the streets.

He gives the poor and sick in India a good place to be and an opportunity to be cared for holistically. Baskaran has many who work in teams with him, and with his own Ayurvedic priests who specialize in various life themes, he offers various rituals and prayer to those who may need this!
